

Fiber-to-the-Home Construction Update

Kirk Erickson digging a trench for a neighborhood subdivision.

The temperatures have heated up and Hamilton construction for a complete fiber-to-the-home infrastructure continues to progress.

To date, over 1,200 customers have been converted to direct fiber connections, and approximately 30% of the total project work has been completed, which includes burying the mainline fiber and infrastructure to prepare a neighborhood for fiber service.

Construction currently consists of burying drops to homes and businesses in Aurora, which allows the splicing crews to follow behind connecting and installing the fiber. In Doniphan, the mainline of fiber is being installed in the Amick Acres subdivision and fiber site surveys are being completed in customer homes.

With fiber installation, Hamilton will be delivering some of the fastest internet speeds in the state! The highest tier delivers up to 1 Gig of download speed in the Whole Home Gig plan. All customers will see increased internet speeds once fiber has been installed in the home.

The communities we serve are great places to live, work and play. Our mission is to ensure you have the best connectivity to internet and much more. Hamilton is excited to deliver the fastest, most reliable internet service available!

"Our crews and customer service team are working diligently to keep the project running smoothly and reach customers as quickly as we can."

— Pat Shaw, General Manager
